

Our **holistic** approach is to **protect** all people from the what they **Touch**, to the **Air** they breathe, and the **Water** they drink.

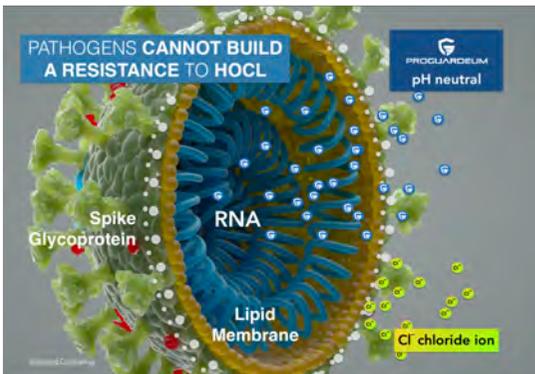

Proguardeum Corporation is committed to helping our customers globally solve their toughest challenges with eco-friendly sustainable solutions to disinfect surfaces, mitigate air and waterborne pathogens, and validate our solutions.

To bolster the reopening efforts for all public environments, Proguardeum in partnership with **Xtreme Cube Corporation**, formed a multidisciplinary team to engineer an important breakthrough in moving forward from the impact of the global pandemic. The **Xtreme Opti-Clean Cube (XOCC)**, is a custom-engineered modular walk-thru structure designed to combat the spread of COVID-19 while entering and exiting building environments. Utilizing the medical-grade **Proguardeum™ Optimum 360** solution, it is the only known environmentally safe hygiene solution that has been tested and validated on-site to eradicate the SARS-CoV-2 virus from positive high touch surface areas.

XOCC delivers a complete 360° coverage of ultra-light volume "dry mist" application of **Proguardeum™ Optimum 360**, an EPA-FDA approved stable pH neutral formulation of hypochlorous solution (HOCL). HOCL is naturally produced in white blood cells to fight against infection, reduce inflammation, and enhance the healing process. Through our proprietary technologies, Proguardeum™ Optimum 360 is produced at its highest purity without any contaminants, offering superior efficacy to inactivate 99.999% of known pathogens and long-standing stability for storage. Diverse applications include: touchless whole room disinfection through aerosol dry misting, hand sanitizers, disposable wipes, sanitizing laundry practises, and food preparation to name just a few.

Our goal is to provide the most sustainable cost-effective solution that contributes not only to protect the environment, but most importantly, improve people's ability return to indoor environments and be able to interact together.
